

Supplement to the 2008 Annual Report to the Illinois General Assembly on Insurance Cost Containment

Rod R. Blagojevich, Governor

Dean Martinez, Secretary
Michael T. McRaith, Director of Insurance

Illinois Department of Financial and Professional Regulation

Division of Insurance

ROD R. BLAGOJEVICH
Governor

DEAN MARTINEZ
Secretary

MICHAEL T. McRAITH
Director
Division of Insurance

September 2008

To the Honorable Members of the General Assembly:

The Illinois Insurance Cost Containment Act requires the Director of Insurance to submit an annual report to the General Assembly by April 15th of each year containing his analysis of the Illinois insurance market and his recommendation of the most appropriate and comprehensive cost containment system for the state (Article XLII, 215 ILCS 5/1202(d)).

In accordance with the requirement of Section 5/1202 of the Illinois Insurance Code, I submitted the Annual Report to the General Assembly on Insurance Cost Containment for 2008 on April 15, 2008. It contained significant information on both a nationwide and Illinois basis regarding the underwriting results for the property and casualty insurance industry for the year 2006.

In the cover letter for the 2008 Annual Report, I reported that I asked my staff to provide a supplement to this report, which would include 2007 and subsequent data and information. This document supplements the 2008 Annual Report.

Sincerely,

Michael T. McRaith, Director
Illinois Division of Insurance

Appendix A: Consolidated Assets of Illinois-licensed Property/Casualty Insurers for the year ending December 31, 2007.

Appendix B: Consolidated Liabilities, Surplus and Other Funds of Illinois-licensed Property/Casualty Insurers for the year ending December 31, 2007.

Appendix C: Consolidated Statement of Income for Illinois-licensed Property/Casualty Insurers for the year ending December 31, 2007.

Appendix D: Consolidated Exhibit of Premiums and Losses in the State of Illinois for All Illinois-licensed Property/Casualty Insurers During 2007.

Appendix E: Consolidated Insurance Expenses Exhibit Part III of Illinois-licensed Property/Casualty Insurers for 2007.

Appendix F: Consolidated Schedule T of all Property/Casualty Insurers for 2007.

Purpose of This Supplement

The Division of Insurance is required by statute to submit an *Annual Report to the Illinois General Assembly on Insurance Cost Containment* by April 15th of each year. Because much of the insurance company financial data necessary to compile the report are not available until March 31st, some information in the Annual Report is nearly 18 months old at the time of publication. For example, the Annual Report submitted on April 15, 2008 summarized insurance information for calendar year 2006.

However, with the significant changes in the property and casualty insurance markets over the past several years, the Division believes a more timely review of the Illinois insurance marketplace is in order. This supplemental report looks at market conditions occurring during 2007 and the first several months of 2008 to provide a more accurate assessment of the current Illinois property and casualty industry.

Note: Some of the data included in this report is the same as that reported on April 15, 2008. This redundancy is primarily found in the information derived from the data filed pursuant to the Cost Containment Act.

OVERVIEW

The Property/Casualty Industry

By State, Region and Line of Business

As a whole, the U.S. property/casualty industry experienced a loss-to-premium ratio of 53.8 percent in 2007. This was an increase of two percent from 2006, but an improvement from 2005 when the ratio was 66.9 percent, the year of Hurricane Katrina. The loss-to premium ratio is calculated by dividing losses incurred by direct premiums earned.

In 2007, Illinois ranked fifth in the amount of direct property/casualty premiums written in the United States, behind California, Florida, New York and Texas. New York had the highest loss-to-premium ratio of these five states last year at 60.6 percent, while Florida had the lowest with 43.5 percent. Illinois was second with 58 percent.

Regionally, during 2007 the mid-Atlantic region experienced the highest loss ratio with 59.1 percent. The mid-Atlantic region is made up of the states of New Jersey, New York and Pennsylvania. Over the past five years, the southeast central region experienced the highest five-year average loss ratio of all the regions with 70.8 percent, due in part to bad hurricane and windstorm seasons over that period of time. The southeast region includes the states of Mississippi, Alabama, Tennessee and Kentucky.

This report contains analysis of premiums and losses for specific lines of property/casualty insurance for Illinois as compared to the rest of the nation. These lines of business are specified in the Illinois Cost Containment Act of 1986. They are homeowners, private passenger automobile, commercial automobile, medical malpractice and general liability. Analysis of the workers' compensation line of business is also included in the annual report and this supplement to that report.

In Illinois the private passenger automobile line of business is the largest market of the property/casualty lines, accounting for 28.2 percent of total written premium in 2007, followed by general liability, workers' compensation, homeowners, commercial automobile and medical malpractice. The rest of the property/casualty lines of business combined totaled 25.7 percent.

This report details each of these markets separately. With the exception of medical malpractice, this report finds each of the identified markets to be operating within an acceptable range of competitiveness and stability.

DIRECT PREMIUMS WRITTEN AND LOSS RATIOS BY STATE

Figure 1 shows a breakdown of total direct premium written (DPW) and losses incurred for the property/casualty industry by state from 2003 through 2007.

Direct written premium in Illinois totaled \$21.1 billion in 2007, representing 4.1 percent of total written premium nationwide. Property/casualty losses in Illinois were 58 percent of direct earned premium in 2007. After a decrease over the last 4 years losses rose slightly in 2007.

* Direct Pure Loss Ratio is calculated by dividing losses incurred by direct earned premium.
Source: NAIC State Data Network; aggregate Schedule T for all property/casualty insurers.

Figure 2 shows the percentages of total direct written premiums, losses ratios for the property/casualty industry for ten regions of the United States during 2007 and the 5-year averages.

Figure 2

Distribution of Direct Premiums Written and Loss Ratios by Region

	Percent	Direct	Direct
	Total	Loss	Loss
2007	2007	Ratio	Ratio
	DPW		5 yr
			Avg.
Pacific	15.8%	52.7%	53.3%
Mountain	6.4	55.7	55.7
NW Central	6.7	58.0	57.2
SW Central	10.7	53.1	69.0
NE Central	12.9	57.7	59.9
SE Central	5.0	52.9	70.8
Mid Atlantic	14.6	59.1	58.9
South Atlantic	20.1	49.3	60.8
New England	5.1	50.7	53.0
Other	2.8	43.9	45.6
Total all regions	100.0%	53.8%	59.1%

*The "other" region includes American Samoa and Guam, Puerto Rico and the U.S. Virgin Islands and Canada.

A look at the five-year average loss ratios shows that the Southeast Central region had the highest losses over the last five years. This can be attributed to the 2005 hurricane season when Hurricane Katrina and other storms made landfall along the Gulf coast. In contrast, the 2006 and 2007 hurricane seasons were much quieter.

Figure 3 illustrates the distribution of property/casualty premium written by line of business during 2007 in Illinois. As the chart shows, personal-lines insurance (homeowners and private passenger automobile) makes up the largest portion of the property/casualty market. Private passenger automobile (28.2 percent), including both the liability and physical damage component, is the single largest line of business.

Pursuant to Illinois Administrative Code Title 50, Chapter I, Subchapter iii, Part 4203 companies are required to file data for private passenger automobile (liability and physical damage separately), homeowners (including residential fire), commercial automobile liability, and specified insurance classes from the medical malpractice and other liability lines. In this year's supplemental report, the workers' compensation line of business has also been included as a separate line.

ANALYSIS OF THE MARKETPLACE

From both a consumer's and a regulator's standpoint, insurance regulation should provide an environment where:

1. Coverage is available.
2. Coverage is offered at a reasonable price.
3. Coverage is available from reliable insurers.

The Cost Containment Act requires the Division to analyze the marketplace each year and to recommend changes that may be needed to correct market problems.

The Division measures the overall competition of the Illinois marketplace by looking at three elements: availability, profitability, and reliability.

Availability

The Division measures availability in three ways:

1. Herfindahl/Hirschman Index (HHI) and Market Shares by Line.
2. Market Shares of Residual Market Mechanisms.
3. Participation in Alternative Risk Transfer Mechanisms.

Herfindahl/Hirschmann Index (HHI) and Market Shares by Line

The Cost Containment Act requires the Division to collect and analyze data in five major lines of business: homeowners', private passenger automobile, commercial automobile liability, medical malpractice, and other liability. This report contains a comparison of underwriting results for Illinois versus nationwide for these five lines of business and an analysis of market concentration and market share in the State of Illinois. Market concentration is determined using an economic measure known as the Herfindahl/Hirschmann Index (HHI). The HHI is the summation of the squares of each company's market share. Generally, an HHI of 1800 or above is an indication that the market may be too highly concentrated and may be approaching anti-competitive behavior.

Homeowners HHI

Figure 4 provides a graph of the HHI for Illinois homeowners' insurance from 2003 through 2007. As the chart shows, the market for homeowners' insurance continues to demonstrate a healthy level of competition.

Figure 4

**Illinois Market Concentration - Homeowners
(2003-2007)**

The top ten Illinois homeowners' writers (including residential fire) and their market shares for 2007 and 2006 are shown in **Figures 5 and 6**.

Progressive Premier Ins Co Of IL	19,665	18,808	2.2%	59.8%	4.8%	9.8%	1.0%

Losses incurred, defense and cost containment expenses incurred and taxes, licenses and fees are shown as a percent of earned premium. Commission and brokerage expenses are shown as a percent of written premium.

Medical Malpractice HHI

Figure 13 provides a graph of the HHI for Illinois medical malpractice coverage from 2003 through 2007. As is the case for most other states, the largest writer in Illinois of medical malpractice coverage is a physician-affiliated exchange. In Illinois that provider is the ISMIE Mutual Insurance Company, which wrote 67.8 percent of the medical malpractice coverage in 2007. The second largest medical malpractice insurer, by direct written premium, was American Physicians Assurance Corp., which wrote only 6.4 percent of the business. As the chart shows, the market continues to be highly concentrated with an HHI well above the 1800 level.

Figure 13**Illinois Market Concentration - Medical Malpractice (2003-2007)**

Figures 14 and 15 shows the top ten Illinois medical malpractice writers and their market shares for 2007 and 2006.

Market Shares of Residual Market Mechanisms

States establish residual market mechanisms to provide coverage for consumers who are unable to buy coverage in the voluntary market. Illinois residual market mechanisms provide essential insurance coverage for the hard-to-place risk at rate levels approved by the Division. Illinois has residual market mechanisms for three lines of insurance: property, automobile, and workers' compensation.

Property - The Illinois FAIR Plan Association (FAIR Plan)

Fire and homeowners' insurance are placed directly through the FAIR Plan. Both personal and

commercial insurance is available. Insurance companies share in the FAIR Plan's profits and losses in proportion to their voluntary market shares.

In Illinois, property insurance is widely available in the voluntary marketplace and only a very small percentage of consumers obtain coverage through the FAIR Plan. In addition, Illinois consumers are not at a coverage disadvantage when they buy insurance from the FAIR Plan, as is the case in many other states. In other states, property residual market programs offer only dwelling fire or basic homeowners' policies. Illinois has one of the most progressive FAIR Plans in the nation. Through the FAIR Plan Illinois consumers can buy virtually the same coverages that are available in the voluntary marketplace, including guaranteed replacement cost, sewer back-up, earthquake, and building ordinance and law endorsements.

Figure 22 shows the total amount of dwelling and homeowners' premium written by the FAIR Plan as well as a percentage of all dwelling and homeowners' premium written in Illinois from 2003 through 2007.

Figure 22

**Written Premiums for Illinois FAIR Plan
(2003-2007)**

	Amount of Written Premiums	As % of Total Written Premiums
2003	\$9,800,000	0.49%
2004	\$11,030,119	0.52%
2005	\$9,073,367	0.41%
2006	\$7,018,505	0.31%
2007	\$6,047,739	0.26%

Source: Premium amounts provided by Illinois FAIR Plan

Automobile - The Illinois Automobile Insurance Plan (Auto Plan)

Private passenger automobile risks are assigned to private passenger automobile insurers on a rotational basis in proportion to their voluntary market shares. Assignments stay with the company and are not shared with other writers. Commercial automobile risks are placed through servicing companies. Losses are divided among the voluntary writers of commercial automobile insurance in proportion to their share of the voluntary business.

Figure 23 shows the 2003 through 2007 market shares for the Illinois Automobile Insurance Plan compared to nationwide data. The percent of written car-years is derived by dividing the number of written car-years insured through the residual market by the total number of written car-years insured through the voluntary market. Note that Illinois has a significantly smaller number of automobiles in the residual market than the nationwide composite.

The percent of insured automobiles in the Illinois Automobile Insurance Plan was three hundredths of a percent of the total market in 2006. This figure reinforces the fact that the voluntary auto insurance market in Illinois is extremely competitive.

Figure 23

**Percent of Automobiles in Illinois Assigned Risk Plan
and the United States Composite Automobile Residual Market
(2002-2006)**

	2002	2003	2004	2005	2006
Illinois	0.05%	0.06%	0.05%	0.04%	0.03%
Nationwide	0.52%	0.54%	1.43%	1.27%	1.21%

Source: AIPSO Facts 2006 (based on liability car-years). 2007 data is not available at this time.

Workers' Compensation - The Illinois Workers' Compensation Assigned Risk Pool (Pool)

Several insurers act as servicing carriers for the Illinois Workers' Compensation Assigned Risk Pool. Losses are divided among the voluntary writers of workers' compensation in proportion to their shares of the voluntary business.

Figure 24 shows the percent of Illinois workers' compensation premiums written through the Pool from 2003 through 2007. The chart shows the amount of business being written in the residual market. During 2007, only four percent of Illinois direct premiums written for workers' compensation were written through the Pool.

The numbers illustrated in Figure 24 are from the NCCI and may not reconcile with numbers found in previous reports.

Figure 24

**Percent of Illinois Workers' Compensation Written Through the Pool
(2003-2007)**

	2003	2004	2005	2006	2007

Participation in Alternative Risk Transfer Mechanisms

Traditionally, the level of participation in alternative markets is an indicator of how well the admitted market is doing at providing coverage or providing coverage at prices consumers perceive to be reasonable. Therefore, if we are to assess the insurance marketplace in terms of availability we must look at the level of activity in these alternative markets.

One problem with the non-admitted market is that there are few means by which it can be monitored. Because of the Division's limited authority over many of the alternative mechanisms, the number of risks placed and the amount of premium written cannot be assessed and a complete picture of this aspect of the insurance marketplace is unattainable. This problem has become more prevalent as the size of the transfer of risk alternative markets continues to grow.

Surplus lines refers to insurance written by a non-admitted (unlicensed) insurer through a licensed surplus lines producer. The licensed producer must exercise due diligence in protecting the insured since the Division has no jurisdiction over unlicensed companies and the Illinois Insurance Guaranty Fund provides no protection for the consumer. Thus, it is the producer and not the Division who must determine the company's financial stability and standards of management prior to submitting the risk.

Figure 30 shows the number of policies written in Illinois from 2003 to 2007 through surplus lines producers for homeowners', private passenger auto liability and physical damage, commercial auto liability, medical malpractice and general liability coverage.

Figure 30**Surplus Lines - Number of primary and excess policies written in Illinois (2003 - 2007)**

Line of Business	2003 Illinois Policy Count	2004 Illinois Policy Count	2005 Illinois Policy Count	2006 Illinois Policy Count	2007 Illinois Policy Count

General Liability	20,857	25,310	26,137	25,696	29,001

Source: Surplus Lines Association of Illinois

INEX (previously the Illinois Insurance Exchange) provides a market for direct insurance and reinsurance. It is comprised of syndicates which underwrite and insure risks, and brokers who are authorized to place business with those syndicates. Fashioned after Lloyd's of London, INEX serves as a facilitator, record keeper and regulator for the operations of its members. INEX submits an annual financial statement to the Division reflecting both its combined financial position and the financial position of each individual syndicate.

Insurance Pools are groups that join together for the purpose of sharing certain risks on an agreed-upon basis. Participants may consolidate their risk exposures without being subject to the same regulatory requirements as admitted insurers. Pools organized under the following Acts are allowed in Illinois:

The Workers' Compensation Act allows entities that are members of a trade association or that have similar risk characteristics to form a risk-sharing pool. Each pool must submit annual financial statements, CPA audit reports, and actuarial opinions to the Division and are subject to examination by the Director.

The Religious and Charitable Risk Pooling Trust Act permits entities having an IRS 501c(3) exemption (a non-profit entity) or hospitals owned and operated by a unit of local government to form a trust to pool their risks. These trust funds can only operate with prior approval of the Director. The trusts must make annual CPA audit reports to the Division and are subject to examination by the Director.

The Intergovernmental Cooperation Act enables units of local government to enter into a pooling arrangement with other similar entities for the purpose of risk sharing. These pooling arrangements are not regulated by the Division, however, they must register with the Division and file annual audited financial statements.

Risk Retention and Purchasing Groups are allowed under the Federal Liability Risk Retention Act of 1986. This Act eliminated barriers to group self-insurance programs by allowing them to buy group liability insurance. At the end of year 2007, there were 433 registered purchasing groups, 109 registered foreign risk retention groups and one registered domestic risk retention

group.

Captive Insurance Companies may be formed by:

- A company or group of companies to insure their own risks and exposures;
- An association to insure the member organizations; or by
- Industrial insured groups.

Illinois captives are regulated by the Division. They are required to file certain financial information with the Division and are subject to examination by the Director.

Self-insurance occurs when individuals or businesses retain their own risks. Entities that self-insure are under no obligation to report premiums, losses, or expenses to any statistical association or regulatory body.

Profitability

In monitoring competition in general and price performance in particular, the Division does not examine individual insurer prices for appropriateness. To do so is virtually impossible. Instead, it monitors the effectiveness of competition, examining the pattern of profits throughout the market.

In examining profitability, the Director must balance the seemingly divergent concerns of consumers and insurers. To protect consumers, rates must not be excessive. There is a fine line between rates that are excessive and rates that are inadequate, especially since insurance policies must be priced long before the results of the pricing decisions are known.

The Division must also be concerned about the long-term viability of the insurance marketplace, including the financial viability of the companies that insure consumers.

Illinois-specific Underwriting Results Compared to Countrywide Results

For each of the coverages listed below, this section contains:

1. Combined underwriting results for business written in Illinois and business written countrywide; and
2. A five-year trend for Illinois losses as a percent of premiums earned, compared to the five-year trend for countrywide losses.

Personal Lines Insurance

Figure 31 shows the percentage change in the Consumer Price Index during the previous twelve months ending July 2008 and 2007 for the personal lines of insurance - auto and homeowners - and related items.

Figure 31**Percent Changes in Consumer Price Index for Automobile Insurance, Household Insurance, and Related Items**

	Un-Adjusted 12-mos. Ended July '08	Un-Adjusted 12-mos. Ended July '07
All items	5.8%	2.4%
Household insurance and related items		
Tenants' and household insurance	1.9%	0.2%
Auto insurance related items		
Motor vehicle parts and equipment	6.3%	3.1%
Motor vehicle maintenance and repair	5.1%	3.1%
Medical care	3.5%	4.3%

Source: U.S. Dept. of Labor, Bureau of Labor Statistics

In **Figures 32** through **43** the “countrywide” figures are the aggregate amounts for Illinois-licensed insurers nationwide underwriting results. This data comes from the Insurance Expense Exhibit Part III.

Figure 32 shows a comparison of the underwriting results of homeowners insurance written in Illinois with that written nationwide during 2007. As figure 32 shows, incurred losses in Illinois for the year were higher than the nationwide loss ratio.

Figure 32**Homeowners' Underwriting Results (2007)**

Homeowners (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	\$2,353,766	\$46,205,460
Direct earned premiums	\$2,321,924	\$45,545,408
Expenses (<i>% earned premium</i>)		
Incurred losses	62.6%	52.9%
Def. & cost cont. exp. incurred	1.2%	1.5%
Comm./brokerage	13.7%	13.4%
Taxes, licenses & fees	1.4%	2.5%

**Source: NAIC State Data Network 2007 Insurance Expense Exhibit Part III, Illinois-licensed insurers.

Figure 39 compares the five-year loss percentages trend for Illinois and countrywide medical malpractice insurance. After soaring to over 150% of earned premium in 2002, losses in Illinois have dropped each year.

Figure 39

**Medical Malpractice Losses as a % of Premiums Earned
(2003-2007)**

Other Liability

Figure 40 compares the underwriting results between Illinois and countrywide for the other liability line of business.

Figure 40

General Liability Underwriting Results (2007)

Other Liability (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	\$2,712,543	\$39,859,852
Direct earned premiums	\$2,578,838	\$39,256,563
Expenses (% earned premium)		
Incurred losses	74.4%	53.4%
Def. & cost cont. exp. incurred	17.8%	13.1%
Comm./brokerage	8.6%	12.4%
Taxes, licenses & fees	2.0%	2.3%

*Source: NAIC State Data Network, 2007 Illinois State Page Exhibit

**Source: NAIC State Data Network 2007 Insurance Expense Exhibit Part III, Illinois-licensed insurers.

Figure 41 compares the five-year trend for loss percentages for Illinois and countrywide for other liability insurance. Losses as a percent of earned premium in Illinois in the other liability line of business experienced a significant increase while the national percent remained steady.

Figure 41

**Other Liability Losses as a % of Premiums Earned
(2003-2007)**

Workers' Compensation

Beginning in 2004, the loss ratio in the workers' compensation market in Illinois has been above the national loss ratio, but declined from 2006 to 2007.

Figure 42 shows a comparison of the underwriting results in 2007 in the workers' compensation line of business between Illinois and nationwide.

Figure 42

Workers' Compensation Underwriting Results (2007)

Workers' Compensation (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	\$2,677,332	\$35,154,782
Direct earned premiums	\$2,599,545	\$34,659,050
Expenses (% earned premium)		
Inurred losses	68.6%	60.0%
Def. & cost cont. exp. incurred	5.0%	5.9%
Comm./brokerage	6.6%	7.1%
Taxes, licenses & fees	2.7%	4.7%

*Source: NAIC State Data Network, 2007 Illinois State Page Exhibit

**Source: NAIC State Data Network 2007 Insurance Expense Exhibit Part III, Illinois-licensed insurers.

Figure 43 shows workers' compensation losses as a percent of earned premium for the years 2003 through 2007. Workers' compensations losses as a percent of earned premium in Illinois increased from 2004 to 2006, but declined in 2007.

Figure 43**Workers' Compensation Losses as a % of Premiums Earned
(2003-2007)****Reliability**

In determining whether the overall marketplace is viable the Division must consider:

1. Profitability.
2. Financial Solvency Regulation.

Businesses that provide a financial service must be financially sound. An insurance contract has little value to the insured if there is no guarantee that the insurance company will have the money to pay claims when needed.

As discussed earlier, the Division must balance the seemingly divergent concerns of consumers and insurers. While we must ensure that consumers are able to buy insurance at a reasonable price, we must also ensure the overall viability of the marketplace.

One measure of a company's financial performance is its profitability. It must generate enough profit to survive and succeed. In a given month, if expenses exceed income they must be paid from the reserve fund. If the trend continues, reserve funds run out causing the business to collapse. Therefore, it is imperative that insurance companies manage income and expenses to assure profitability and survival.

A company that can offer insurance coverage at competitive prices and reap adequate profits is considered to be financially viable. When the majority of insurers in the market are competitive and profitable, the market is considered to be financially strong.

Profitability

Change in Policyholders Surplus

One measure of overall profitability is the change in policyholders' surplus from one year to the next. Policyholders' surplus is made up of: 1) underwriting gains or losses; 2) investment gains or losses; and 3) net contributed capital and other surplus changes.

Figure 44 shows the percent change in policyholders' surplus for the Illinois-licensed property/casualty industry as a whole over the past five years.

Figure 44

Percent Change in Policyholders' Surplus

Source: NAIC State Data Network

Figure 45 shows income from investments, net income, unrealized capital gains/losses and policyholders' surplus from 2003 to 2007.

Figure 45

Net Investment Income Earned, Net Income, Unrealized Capital Gains/Losses and Policyholders' Surplus (in millions)

	2003	2004	2005	2006	2007
Net Investment gain	\$40,893	\$44,952	\$53,915	\$53,434	\$59,558
Net Income	27,199	36,488	39,675	61,230	56,685
Unrealized Capital Gains/Losses	30,624	17,189	4,096	28,677	8,131
Policyholders' Surplus	365,589	408,140	441,620	498,408	531,200

Source: NAIC State Data Network

Underwriting Gains/Losses

Figure 46 shows the aggregate underwriting gain/loss for Illinois-licensed insurers from 2003-2007. The property/casualty industry experienced a healthy underwriting gain in 2007.

Figure 43**Aggregate Net Underwriting Gain (Loss) (in millions)**

	2003	2004	2005	2006	2007
Premiums earned	\$325,159	\$344,724	\$344,913	\$359,332	\$362,387
Losses incurred	200,092	206,102	213,774	191,391	205,225
Loss expenses incurred	41,892	44,217	45,351	42,950	42,990
Other underwriting expenses incurred	85,604	88,666	90,570	96,724	98,687
Dividends to policyholders	<u>1,197</u>	<u>978</u>	<u>1,040</u>	<u>2,540</u>	<u>1,359</u>
Net underwriting gain/loss	<u>(\$3,626)</u>	<u>4,761</u>	<u>(5,822)</u>	<u>25,727</u>	<u>14,126</u>

Source: NAIC State Data Network

Net Investment Income Ratio

One component of surplus is income derived from investments. The net investment income ratio measures income from invested assets relative to earned premiums. It is calculated by dividing net investment income (income from invested assets less investment expenses and depreciation on real estate) by earned premium.

Figure 44 shows the net investment income ratio for Illinois-licensed property/casualty insurers during the most recent five-year period. This ratio shows the investment income component of overall profitability.

Figure 44**Net Investment Income Ratio (2003-2007)**

Source: NAIC State Data Network

Return on Policyholders' Surplus

Another measure of overall profitability is the return on policyholders' surplus. It is the sum of net income after dividends and taxes and unrealized capital gains divided by the average of the current year and prior year's policyholders' surplus.

Figure 45 shows the aggregate return on policyholders' surplus from 2003 through 2007 for the Illinois-licensed property/casualty industry combined.

Figure 45

Source: NAIC State Data Network

Financial Solvency Regulation

Although the Division cannot guarantee that Illinois-licensed insurers are profitable, we monitor the financial solvency and strength of Illinois-licensed insurers in several ways including:

1. Maintaining a staff of trained accountants and specialists who identify companies developing financial difficulties so that the Division can step in to minimize potential losses to Illinois policyholders;
2. Working closely with insurance companies with identified financial difficulties to minimize potential risk to policyholders while attempting to resolve manageable problems or determine the need for rehabilitation or liquidation;
3. Employing field examiners for on-site evaluation of insurance company financial records;
4. Reviewing operations and compliance issues through scheduled, targeted, and special exams of known or suspected problems;
5. Maintaining a staff of actuaries who monitor the adequacy of loss reserves, cash flow testing, and proper valuation of assets;

6. Licensing and registering the many types of insurers, surplus lines producers, and risk sharing pools authorized by the Illinois Insurance Code and related Acts; and
7. Investigating unauthorized organizations or individuals thought to be conducting illegal insurance operations and taking regulatory action to remove them from the market to protect consumers from fraudulent activities.
